ABSTRACT

This report presents statistical information on the 40,570 children with disabilities in Nebraska special education programs. The following data are included: (1) special education child count as of December 1, 1996, by child's age, disability, race, and ethnicity; (2) children with disabilities in nonpublic schools by age, disability, and county; (3) children with disabilities who are wards of the state or the court by age, disability, and county; (4) program providers and the age and disability of the children they serve; (5) instructional settings of children with disabilities by disability and age; (6) time in special education by disability, age, and instructional setting; (7) services provided by disability and age; (8) method of instruction and reading mode for children with visual and hearing impairments; (9) child count by county; (10) child count by school district; (11) children with disabilities aged birth through five by age, disability, and school district; and (12) number and transition age of children with disabilities aged 16-21 by age, disability, and school district. The report also includes historical trend data, data on the exit reasons of children with disabilities who left special education, and race/ethnicity totals by gender and disability. Data collection forms are appended. (CR)

Nebraska Special Education Child Count December 1, 1996

The Nebraska Special Education Child Count is conducted each year as of the first day of December. The December 1, 1996, Special Education Child Count total is 40,570. Membership figures for all students are collected by State Statute as of the last Friday of September each year. The September, 1996, membership total is 333,761*. Membership totals are collected from Public School Districts, Nonpublic Schools, Educational Service Unit Schools and State Operated Schools. Special Education Child Counts are collected from Public School Districts, State Operated Schools and Private Service Providers (such as hospitals and residential treatment centers). While it is recognized that there will be differences in comparing counts taken on different days and from slightly differing reporting entities, these figures represent the available data for the two populations and users of the data are advised of such differences.

Each child who is reported to SESIS has a verified disability according to Nebraska Department of Education Rule 51, is receiving services according to an IEP/IFSP and is counted once in the category corresponding to the child's primary disability. If a child has more than one verified disability, the primary disability is designated by the school district. For example, if a child has a Mental Handicap:Severe/Profound and Orthopedic Impairments, the child's primary disability could be shown as Multiple Impairments and the child would be included in the Multiple Impairments total but not in the count of Mental Handicap:Severe/Profound or Orthopedic Impairments.

Nonpublic School Status

Out of the 333,761 children enrolled for the 1996-97 school year, approximately 12.5% (41,794) were enrolled in non-public schools. Of these 41,794 children enrolled in non-public school, 1,284 children were verified with a disability and receiving public, special education services, a 2.5% decrease from the 1995-96 school year. This population is 3% of the total non-public enrollment for the year.

Non-public school children with disabilities represent 3.2% of the 40,570 children with verified disabilities in 1996. The next page shows the same non-public population by the child's county of residence. The non-public school attended is not necessarily within The table below summarizes the non-public population receiving special education services by the child's age and primary disability. the child's county of residence.

Of the 40,570 children with verified disabilities in the 1996-97 school year, 3.3% are reported as wards of the state or the court. These children are reported by the school district of financial responsibility or the agency providing the service if a school district cannot be determined.

As represented in the chart below, the disability categories of behavioral disorders and specific learning disabilities together comprise nearly 50% of the ward population. The tables on the next two pages outline ward status by the child's county of residence and primary disability.

Instructional Setting

Beginning the 1995-96 school year, school districts were given revised setting codes to use in their reporting. Codes for family day care, regular nursery, early intervention class, and outpatient service facility were added for children birth to age two. The categories of centerbased preschool and neutral site are no longer valid codes. District records are being updated to include these new settings.

The most frequently reported setting is in the public school. In 1996 this service setting was reported for 92.26% of the children with verified disabilities. The following pages outline the service settings according to the child's primary disability and age.

and a special education "inclusion" category. Special education (pull-out) is the time the child receives services outside the The district is asked to report the percentage of the school year that each child receives special education services. Beginning October, 1995, school districts are required to report the percentage of time using both a special education "pull out" category regular education classroom. Special education with regular education peers (inclusion) is special education services provided in the regular education classroom. School districts are required to revise their reporting to include this distinction by October, 1996 for children below age five and October, 1998 for school age children. Updates are being sought for below age five ecords

The three reports which follow show the percentage of time children are spending in special education according to primary disability, child's age and instructional settings.

- 1-11. Check all services the child is receiving as specified in the child's IEP/IFSP (include district owned and contracted services).
- 1-12. Compute the percent of time using the child's educational program as full time (100%). Full time may vary for each child but typically full time for a high school child would be based on 1080 hours and 1032 hours for an elementary school child.
